水/前处理系统

>> Water /Pretreatment System

>> 砂滤及炭滤器 Sand Filter and Carbon Filter

采用不同的过滤介质，(石英砂、锰砂、或活性炭)处理水源水，净化及除去水中悬浮物、余氯、杂质、有机物和吸附异味。

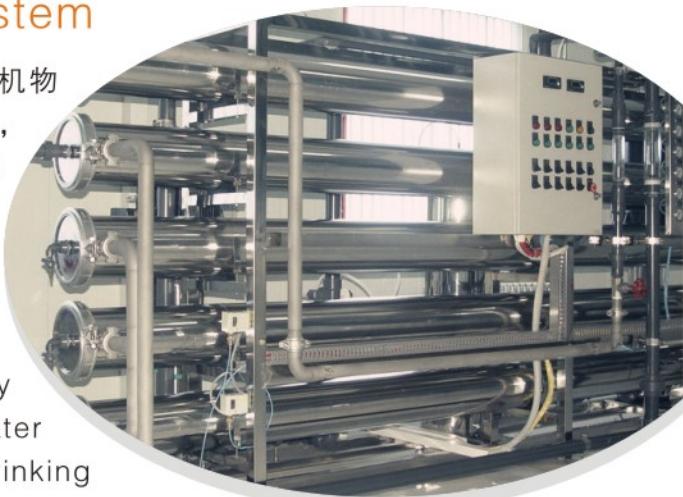

These two types of filter adopt different types of filtering media (Quartz Sand, Manganese, and Activated Carbon) to treat raw water to effectively purify and remove suspended solid pollutants, residual Cl⁻, impurities, and organics in water.

>> 反渗透系统 Reverse Osmosis System

该装置依分子透析压差原理，将水中之无机盐，有机物杂质等除去，达到纯化的目的。适用于，海水淡化，苦咸水淡化，饮用纯净水，蒸馏水制造，给水等领域。

Reverse osmosis (RO) is according to the molecular dialysis differential pressure principle. It is remove the inorganic salt, organic matter and infectious microbe from water. And which widely used in producing ultra-pure water, seawater desalination, brackish water desalination, drinking

>> 纳滤系统 Nanofiltration System

纳滤，最常见用于处理总溶固较低的水，如地表水和地下水，其目的是去除水中阳离子，如天然有机物和有机合成物。广泛应用于食品加工，如乳制品加工和天然水制造等。

Nanofiltration is a relatively recent membrane filtration process used most often with low total dissolved solids water such as surface water and fresh groundwater, with the purpose of removing the kation from water, such as natural organic matter and synthetic organic matter. Nanofiltration is also becoming more widely used in food processing applications such as dairy processing and natural water manufacture.

>> 超滤系统 Ultrafiltration System

当水通过超滤膜后，可将水中含有的大部分胶体硅除去，同时可去除大量的有机物等。可耐受高浓度的余氯和过氧化氢溶液，细菌，病毒去除率可达5log.产水浊度小于0.01NTU.

The system uses pollution-resistant, hydrophilic PES as its own building material, so it enjoys the advantage of longer lifetime, lighter weight, and compact structure. On top of that, it can withstand high density residual Cl⁻, H₂O₂ solution. When it is used in treating bacteria and viruses, the killing rate could reach up to 5log. As a result, the water's turbidity is below 0.01NTU, well above American SWTR standard.

>> 紫外光消毒杀菌器 UV Sterilizer

用以消除可能在储槽、管道中遗留在水中的细菌等为生物，以消灭饮用水中细菌病毒，对高纯水、瓶装水等不会产生副作用。

It can kill bacteria and organics or residual bacteria and organics left by ion substitution. On top of that, it can exterminate bacteria in resin bed and bacteria and virus in drinking water. Most importantly, it will not cause any side effect when used in producing ultra-pure water, bottled water etc.

>> CIP系统 CIP System

CIP(Clean In Place)清洗系统，被广泛的用于饮料、乳品、果汁、果浆、果酱、酒类等机械化程度较高的食品饮料生产企业中。采用冲洗水和洗涤剂溶液循环对罐、管道等设备进行清洗、消毒。
